### GREAT OPPORTUNITIES ON THE SMALL SAAREMAA ISLAND

EFFICIENT

FLEXIBLE

AGILE

#### STATE-OF-THE-ART MANUFACTURING SERVICES

**Incap Electronics Estonia is a part of Incap's international group of highly advanced contract manufacturing plants providing efficient, flexible and agile services close to our global customers.**

- Well **experienced in electronics** manufacturing in Estonia since 1994.
- Decentralized structure with a **flexible operations model**.
- More than just a subcontractor, a **strategic production partner** offering technical support and added value on a global level without the cost of bureaucracy.
- Direct communication with decision makers for **fast and flexible solutions**.
- **State of the art production set up** to maintain a constant competitive edge.
- Special attention is paid to the **efficient ramp-up** of new products, which is shortening the time-to-market and giving customers a clear competitive edge in their market.
- Manufacturing is following **lean thinking** and **5S** methodology.
- Floor space **7,300 square meters**.
- Incap Estonia is currently **exporting** to Europe, North America, and Asia.

Saaremaa factory is specialized in the manufacture of electronic and electromechanical products and final assemblies.

Manufacturing of complete product entities or so-called box-build products provide added value to the customers.

Incap is providing electronics manufacturing services to a wide spectrum of customers from start-ups to multinational companies.

# FROM CUSTOMER PRODUCT IDEA TO HIGH QUALITY PRODUCTS

We are specialized in manufacturing electronics, electromechanical products and final assemblies. Our state-of-the-art production capacity with precision output corresponds well with the growing demand

of customers in industrial electronics. The complete product volumes of PCBs in box-build enclosures are steadily increasing providing additional value to our customers.

## OUR SERVICES:

**PCB assemblies manufacturing**

**Box-build assemblies**

**Customized solutions**

**Electromechanical assemblies**

# FROM PROTOTYPES TO GLOBAL MASS PRODUCTION

- Manual and automatic PCB assembly
- Rapid prototyping and maintenance
- Repair and overhaul services (MRO)
- Reflow and wave soldering

- Selective soldering
- Potting and conformal coating
- X-ray check
- Automated check
- Multitude of testing methods

Manufacturing prototypes and pre-series as well as controlled production ramp-ups are elementary processes to Incap. Final assembly, box-build/product integration services, packaging and logistics complement the service offering.

## CERTIFIED QUALITY

- International quality management system ISO 9001
- Environmental management system ISO 14001
- Occupational health and safety management system ISO 45001
- Certificate for manufacturing medical devices according to quality management system ISO 13485

## AWARDS & RECOGNITION

- Responsible Business Index, Bronze Level (since 2019)
- Golden label of Family-Friendly Company from the Estonian Ministry of Social Affairs (since 2018)
- „Best Regional Entrepreneur 2017“ award from Enterprise Estonia
- Swedish Business Award “Sustainability Award 2017” from Swedish Export Council and Embassy of Sweden in Estonia
