WE ARE VELOS IOT

Next-generation independent global connectivity provider

Velos IoT is a privately held MVNO that provides customers access to best-in-class global connectivity in a secure, scalable and sustainable way. Our heritage combines MNO expertise and MVNE experience delivered by experts who own and operate their own connectivity management platform, mobile core and understands the needs of the industry.

Our value propositions are not just megabytes, but the value adds that our customers need for scalability, security, and agility. Harnessing new technologies to deliver solutions faster, but with the resilience and reliability, our customers require. Velos IoT has shipped more than 17M SIMs worldwide and has hundreds of customers from small specialist players to huge manufacturers and OEMs both of whom need to simplify and scale up their connectivity offerings.
