WE MAKE METAL WORK

We are experts in the field of metal processing. Our clients are construction and machinery companies who are leaders in their field with high expectations for quality. The experienced Exmet metal masters are able to meet and exceed these expectations. It is not important what we've done for you in the past – instead we focus on what your company needs right now. This is what we focus on when servicing our clients.

WE CUT, DRILL, BEND, AND WELD

The certified manufacturing processes of Exmet Services meet the strictest requirements of the metal industry and our quality monitoring ensures the best service.

ABOUT US

Exmet Services (Tavepro OÜ) was founded in 2012 by CEO Taavi Vesiaid and Factory Manager Ats Metusala. Our main field of work was manufacturing steel load-bearing structures for warehouses, industrial, office, and agricultural buildings.

In 2020, the company joined Exmet Group and business continued under the new name Exmet Services OÜ. After the merger, we added sheetmetal processing, profile processing, and reinforcement frame manufacturing to our service list. The strategic plan of Exmet Services is to continuously grow the technical capabilities of the company and to become the most competent service center in the region.

Our development is characterized by investments in the most state-of-the-art machinery and developing digitalized solutions to accompany the use of this equipment. What we find even more important than these machines is developing an organisation culture with value-based recruitment. This way we ensure the sustainable development of our team and outstanding customer service.

OUR PRINCIPLES ARE MADE OF STEEL – FOR TODAY AND THE FUTURE

MISSION

Our mission is to bring more value and opportunities to the use of steel through offering our customers a competitive edge and excellent service.

VISION

We are both a manufacturing and a service company. Our vision is to make the purchase of steel services a positive experience equal to consuming the services of your favorite brands.

VALUES

- Hospitable
- Collaborative
- Systemic
- Comprehensive
- Wide-ranging

SHEET METAL PROCESSING

SHEET METAL PROCESSING WITH STATE-OF-THE-ART TECHNOLOGY AND KNOWLEDGE

PLASMA CUTTING

2 MICROSTEP CNC PLASMA CUTTING MACHINES

- Gas cutting / Drilling module
- Work surface area: 2600 × 13000 mm
- Maximum thickness of material: 200 mm

LASER CUTTING

FIBERLASER BYSTRONIC BYSTAR FIBER 6225 DYNAMIC EDITION F12000

- Laser power: 12 kW
- Work surface area: 2600 × 6250 mm
- Maximum thickness of material: 30 mm
- Carbon steel, aluminum, stainless steel, copper

SHEET METAL BENDING

BYSTRONIC XPERT 500/6200

- Maximum bending power: 500 t
- Maximum length of the detail: 6200 mm

BYSTRONIC XPERT 80/1530

- Maximum bending power: 80 t
- Maximum length of the detail: 1530 mm

PROFILE PROCESSING

CNC PROFILE PROCESSING

PROFILE PROCESSING MACHINE KALTENBACH

- Allows to process profiles with measurements up to 1000 × 600 × 16000 mm
- Drilling heads on 3 axes

SHOT BLASTING

GOSTOL SHOT BLASTING MACHINE

- Shot blasting for profiles with dimensions up to 600 × 2500 × 16000 mm

WELDING

WELDING BY EXPERIENCED SPECIALISTS

STEEL STRUCTURES

BUILDING CONSTRUCTIONS AND INFRASTRUCTURE DETAILS

- Manufacturing capacity: up to 500 t per month
- Maximum weight of the assembly: 40 t
- Maximum dimensions of the assembly: 4500 × 7000 mm
- Maximum length: 50 m

MACHINE BUILDING

MANUFACTURING OF MECHANICAL PARTS

- Welding and assembly work
- Packaging
- Logistics

REFERENCES

SEE OUR PREVIOUS WORK

Client Kiiikri Ehitus

- The construction of the wind mill generator plant for TBHAWT Manufacturing
- 20 000 m²
- 500 t of metal
- 8000 h of assembly and welding
- 10 000 m² paintwork

Client M. Rautio

- A 40 ton bridge installed in Tallinkatu street, Helsinki, crossed daily by 10 000 people.
