About Harmet

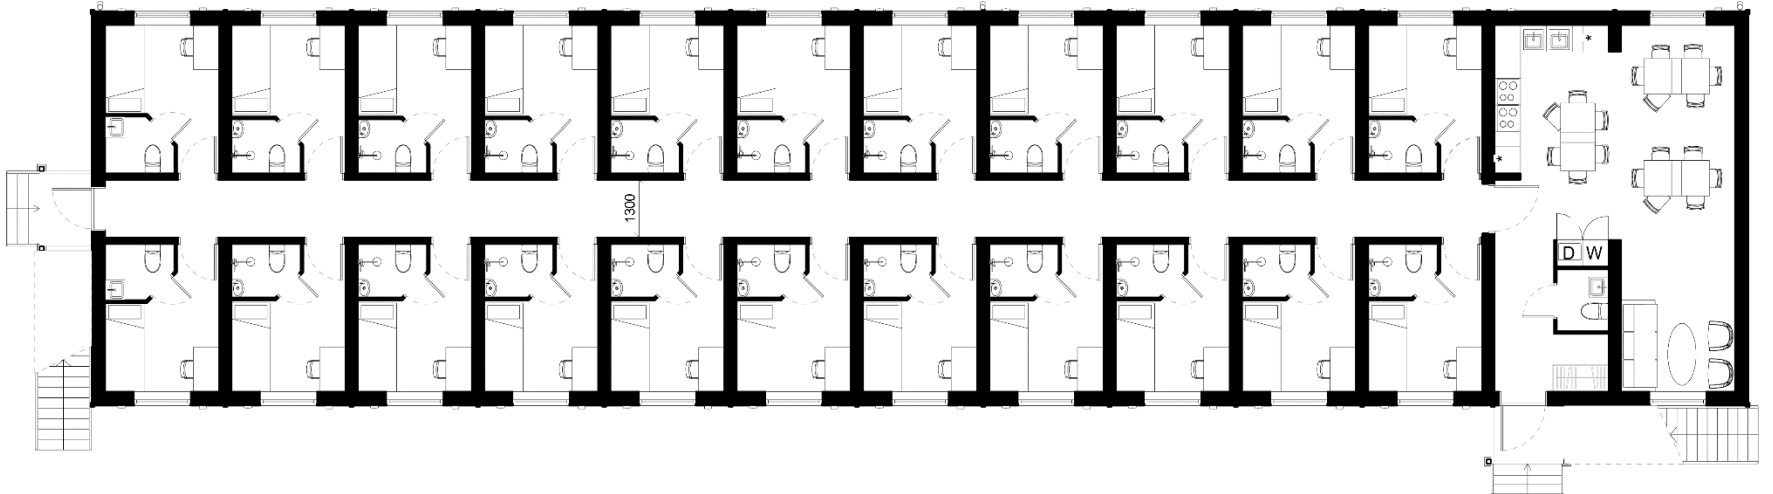

Estonia is the largest exporter of wooden buildings in Europe, according to Eurostat 2022. And Harmet is the largest producer of modular buildings in Estonia, with a turnover of more than 100 million EUR in 2022. More than 95% of this is exported to Sweden, Norway, Finland, Denmark, UK, Netherlands, and USA.

Harmet produces construction site huts, temporary modules (for schools, kindergartens, offices, worker accommodation) and permanent buildings (apartments, student housing) since 1997. We offer complete solutions — from design and product development to final assembly.

Large scale industrial modular production has the potential to significantly reduce the inefficiencies, waste and CO2 footprint of traditional construction.

Housing 44

The accommodation complex is designed to meet the requirements of permanent buildings; however, the design allows to use the modules as temporary accommodation modules. It is easy to dismantle the modules and reuse them in another location. This is a sustainable low carbon solution due to the use of timber frame structures and circularity.

This includes accommodation for 44 workers in 22 modules and commons spaces in 4 modules. The building is on 2 floors and meets TEK17 building regulation and requirements for worker accommodation in Norway, Denmark and Sweden.

Technical Data

- Modules: 2,93x8,9 m (26 pcs)
- 2 floors
- Building footprint: 342 m²
- Total BOA (net area incl internal walls): 625 m²
- Apartment 8,7 m² for one person
- Accommodates 44 people
- Common kitchen/laundry room
- WC/shower for each apartment
- Electrical heating
