About Radius

Radius is a contract manufacturing company with two business units providing CNC machining services & hydraulic assemblies for the OEM sector.

Business areas

**Radius
Machining**

Serial CNC turning, CNC milling, small & medium size sub-assemblies.

**Radius
Hydraulics**

Hydraulic hose & tube assemblies, retail sale, repair & maintenance.

Location

- In Estonia
- Factories in
 - Tallinn
 - Tartu
 - Pärnu

Vision & mission

- ▮ Striving vision is to be the first choice for entrepreneurs and original equipment manufacturers.
- ▮ Radius Group's mission is to be efficient in manufacturing high quality products and a reliable, innovative partner for our customers.

Values

Quality/Environment

Producing high-quality products while using resource saving solutions.

Customers

The customers and their needs have always been at the centre of our business focus and our main priority.

Team

Lifelong learning and long-term employment has given our employees the motivation and the security to grow with us while reaching their personal and professional goals.

Competences

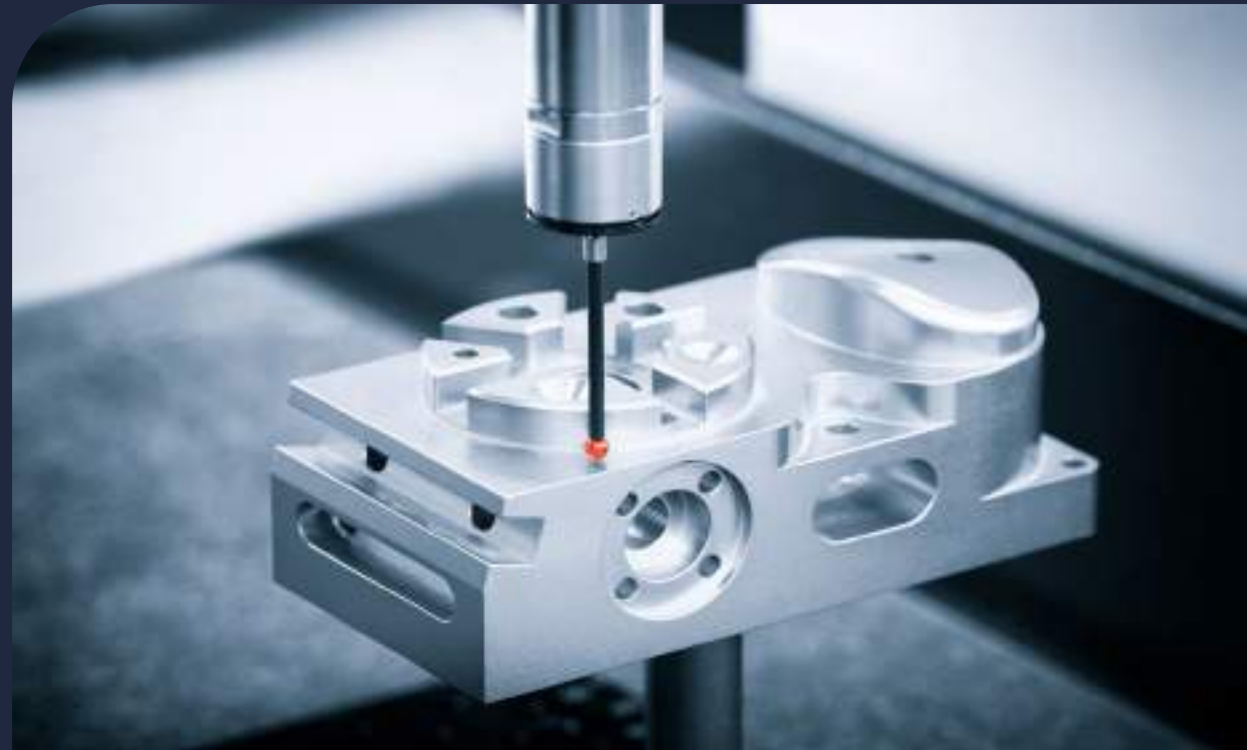

Continuously investing in new machines and technologies enables us to provide modern and cost-efficient solutions in-house.

Quality

Radius has a high-level and well-equipped metrology laboratory and is ISO certified.

Radius is holding **ISO 9001** certification in Quality Management System.

- Measurement protocols, PPAP/FAI
- Traceability for all orders through ERP System
- Certified and regularly calibrated measuring equipment

Environment

We are constantly analysing the environmental impact, focus on using resources sustainably and reducing emissions.

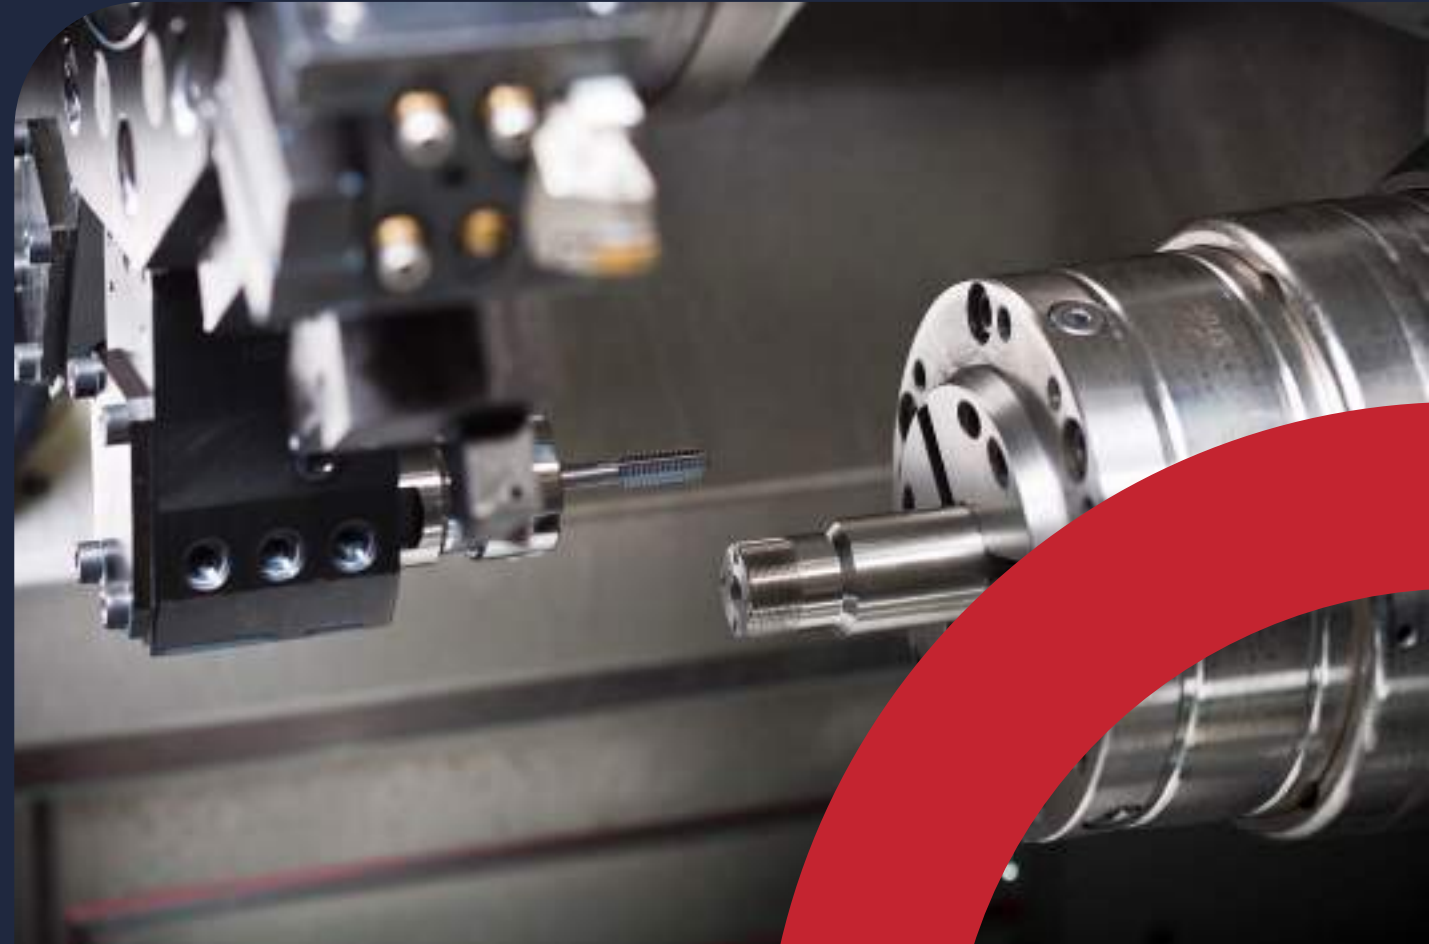

We use **ROHS & REACH** compliant materials to meet the requirements of our customers and have implemented **ISO 14001** for Environmental Management System.

ISO 9001
ISO 14001
BUREAU VERITAS
Certification

CNC turning

- ✓ 20 units
- ✓ Max. dimensions 3 - 560 mm
- ✓ Series 50 - 100 000 pcs/order
- ✓ Live tooling
- ✓ Automatic bar feeders

CNC milling

- 7 units
- Max. dimensions 500 x 500 x 1000 mm
- Series 50 - 10 000 pcs/order
- Automatic pallet changers
- Up to 5-axis

Assembly

- 4 workstations
- Isolated assembly area
- Final inspection

Outsourced services

- Surface treatments
- Welding: MIG/MAG & TIG
- Sheet metal processing

Hoses

Radius Hydraulics produces high-quality hoses and hose assemblies, offering comprehensive assistance in choosing the right hose type, nozzles as well as transitions.

We use a modern Finnpower machine tool that allows us to press hoses with a diameter of up to 2".

Tubes

We use the Herber CNC tube bending machine to produce high-precision parts in series.

The main customer for our hydraulic tube sets is the engineering industry, but we also work with other sectors.

We can bend steel, including stainless steel and other materials from **6 to 38 mm**

The CNC tube bending machine enables the production of precise parts in series.

Components

Radius Hydraulics sells most of the components used in hydraulic systems

- Filters
- Pumps
- Control valves
- Motors
