

SensusQ

Supporting smarter, timely, decisions

INTENT:

To create software that supports our customers in achieving Decision Dominance over their adversary from the tactical edge to the strategic level across all domains.

BENEFICIARIES:

Our solution fuses real time, multi-source information in order to enhance shared understanding. This provides immediate actionable intelligence to enable accelerated decision-making, for commanders operating in complex and unpredictable environments.

COLLECT

Plan and prepare, integrate and receive, capture and ingest

EXPLOIT

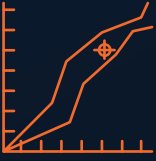

Store and structure, learn and fuse, enrich and discover

SHARE

Analyse and produce, read and report, present and visualise

KEY BENEFITS:

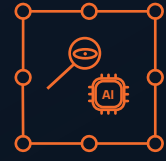

Information finding efficiency improved by 80%

User learning curve is reduced from 4 months to 2 weeks

Transforms unstructured data to actionable intel

Reduced human error with smart automation of the intelligence cycle

APPLICATIONS:

INBUILT FUNCTIONALITY TO SUPPORT

- Full digitalisation of the intelligence cycle from collection plan to reporting
- Simplified data structuring and handling
- Automated data labelling
- Target development
- Information processing and exploitation
- Rapid advanced search options
- Relationship mapping and visualisation
- Provides MoE and MoP of sources and IRs
- Instant access to a common intelligence picture
