

1oT

The image displays a collection of digital assets for 1oT. On the left is a large, stylized logo. In the center is a smartphone showing the 1oT mobile application interface, which includes a search bar for SIMs and a list of SIM identifiers. To the right is a desktop browser window showing the 1oT dashboard. The dashboard features a navigation menu with 'Dashboard', 'SIMs', 'Data packages', 'Apps', and 'App store'. A personalized greeting 'Welcome back, John' is shown. A prominent donut chart indicates '372 SIMs' with a color-coded breakdown. Below the chart are filters for '12m', '30d', and '7d'. A sidebar on the right lists 'What happened' with recent events like '3 SIM reached 0' and 'SMS is still in progress'. At the bottom right, a 'Costs overview' section is partially visible.

A graphic of an eSIM card. It features the 1oT logo and the text 'eSIM' in a green box. Below the logo is a stylized illustration of a SIM card. At the bottom, the text 'Global IoT Connectivity' is displayed next to a green curved graphic element.

1oT eSIM

Global IoT Connectivity

**1oT takes the complexity out of IoT
connectivity**

Global scale brings a unique set of problems

Administrative overhead with SIM management and troubleshooting

Unnecessary costs due to non-optimal connectivity solutions

End up with a duct-taped and non-scalable solution by responding quickly to new opportunities

Solution: A single point of connectivity

1oT eSIM

Access all 1oT's telecom partners without trading out the SIM card.

1oT eSIM & SIM

The easiest way to launch and manage connected IoT devices – anywhere and at any scale

2G, 3G & 4G technology and NB-IoT & Cat-M1
in 190 countries

12 pre-negotiated carrier deals worldwide for
different regions and use cases

1oT eSIM is a SIM card with the superpower of
switching telecoms over the air

Hundreds of IoT companies & service providers love 1oT

“COMODULE has deployed 1oT SIMs in 100,000+ e-scooters in 45 countries worldwide. Including in Jump (UBER) scooters.”

Kristjan Maruste, Co-Founder & CEO

1oT Terminal

SIM and eSIM management platform tailored for IoT

Compare telecoms & swap over the air

Enterprise-ready audit logging & access control

The dashboard features a navigation bar with the 1oT logo and menu items: Dashboard, SIMs, Data packages, Apps, App store, and eSIM management. A user profile icon and notification bell are on the right. The main content area includes a welcome message for 'John', a 'Total SIM inventory' donut chart showing 372 SIMs, a 'What happened while you were away' alert list, and two analytics charts: 'Total consumption' and 'Costs overview'. Annotations with arrows point to specific features: 'Compare telecoms & swap over the air' points to the eSIM management menu; 'Enterprise-ready audit logging & access control' points to the user profile icon; 'SIM lifecycle management & troubleshooting' points to the SIM inventory chart; 'Extensive reporting & analytics module' points to the consumption and cost charts; and 'AI connectivity assistant' points to the alert list.

GSMA SAS-SM certified eSIM infrastructure

Complete lifecycle management

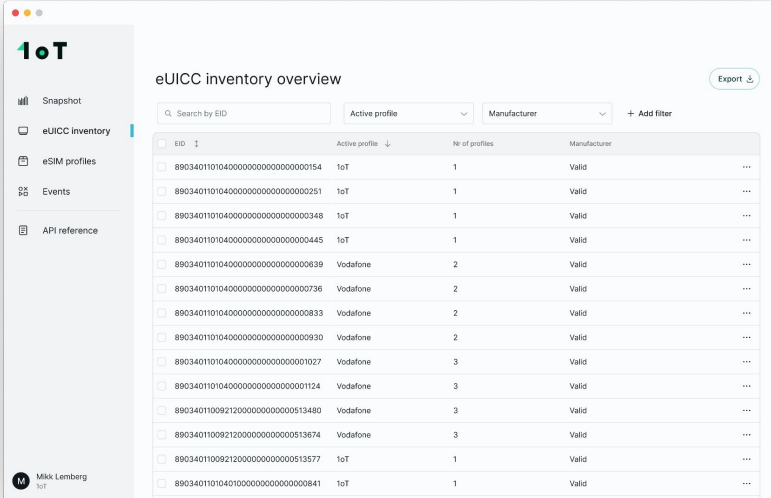

The subscription management system allows you to control and report your eSIM profiles.

Best of both worlds

Our on-site HSM uses 100% renewable energy, while the rest of the infrastructure is in AWS to enable rapid growth.

Bring your own connectivity profile

Bring your current connectivity provider onto 1oT eSIM and have access to other profiles as an assurance.
