

CybExer

We customize our services to meet your unique needs, ensuring you never have to compromise. Our offerings include highly adaptable cyber range environments, designed to replicate your specific operating or training contexts, whether on-premise or in the cloud.

From Opposition Force (OPFOR) support to individual and organizational performance analytics, we provide comprehensive solutions to enhance your cybersecurity capabilities. With expertise in delivering large-scale multinational training events and seamless integration of physical and virtual assets, we're equipped to handle even the most complex requirements.

Solution Offering

Exercises & Events

Live Fire:

Experience highly realistic cyber warfare training with our live-fire simulations. As a trusted provider, we've hosted exercises like ACS and DCM, ensuring battle-tested preparation for your workforce. Test your readiness against authentic cyber threats and emerge stronger, more resilient, and better prepared to defend your organization's digital assets.

Threat Hunting:

Develop your cyber workforce's detective skills with our expertly crafted threat hunting exercises. Provide them with the tools and techniques needed to proactively identify and neutralize potential security breaches. Transform your defenders into proactive hunters and maintain the advantage over cyber adversaries.

Capture-the-Flag:

Participate in strategic challenges with our capture-the-flag events. Engage in tactical operations to outmaneuver adversaries and secure victory. Solve puzzles, crack codes, and demonstrate your cyber expertise to dominate the digital battlefield.

Digital Twins & Technology Testing:

Expertise in digital twins and AI solutions for cybersecurity testing and research. Tools for predictive analysis, scenario testing, and resource optimization.

Employee Testing and Training:

Skill-testing modules for active assessments and improvement of cybersecurity knowledge and behaviors. Customized training plans delivered through our advanced cyber range for effective enhancement of employee capabilities.

Tailored Cyber Range Solutions

Custom Cyber Range Environments

Flexible environments that closely mimic your operational or training scenarios, available onpremise or in the cloud.

OPFOR Support

Expert assistance to challenge and improve your team's skills through opposition force (OPFOR) services and campaign support.

Performance Analytics

Measure and analyze individual and organizational performance with our comprehensive analytics tools.

Smooth Delivery and Integration

Effortless deployment and handover processes ensure seamless management within sensitive environments.

Live Scenario Updates

Instantly update environments to simulate real-time threats, enhancing training realism.

AI/LLM Coding Support

Streamline operations with AI/LLM-powered coding assistance for configuration tasks.

Multinational Training Experience

Benefit from our experience in delivering largescale multinational training events, including NATO CCDCOE exercises.

Device and Software Integration

Easily integrate your own devices and software into our cyber range environments for maximum compatibility.

Global Collaboration

Federate cyber ranges across multiple locations for synchronized training and operations.

Security Classification Elevation

Elevate range environments to higher classifications using customer-approved unidirectional appliances, ensuring compliance with classified requirements as needed.
