

CybExer Technologies

A Leading Expert in Cyber Range Technologies

About Us

CybExer Technologies is a NATO-awarded Estonian cybersecurity company with the mission to empower people and organisations to protect themselves against cyber threats. Our focus is on the human aspect of cybersecurity: to ensure that risk factors related to human behaviour are minimised and to enable swift decision-making and rapid operational response to potential and actual cyber threats.

Mission

We aim to empower people and organisations to protect themselves against cyber threats. We do this by focusing on the human aspect of cybersecurity: to ensure that risk factors related to human behaviour are minimised and that swift decision-making and rapid operational response to cyber threats is a reality rather than a myth.

Values

CybExer offers a variety of solutions that aim to enhance our client's resilience to cyber threats. We develop and maintain state-of-the-art cyber ranges, we carry out technical cyber trainings and exercises, and we offer a range of more specific security solutions and assessments.

Experience

CybExer's team has significant experience in cybersecurity: ranging from dealing with real-life threats to developing specialised cyber platforms and carrying out complex technical and strategic trainings, including VVIP-level cyber exercises. Our capabilities have been employed by both private
