

—HΛΛGE—

**SIMPLICITY
FULL OF LIFE**

We believe in the magic that comes from doing something you love. And that exists in everything that makes you alive. Because sometimes it is the simple things that give you what you most need.

Our job is to make sure that each day is another opportunity for you to be the very best version of yourself.

UNTOUCHED

We believe that clear thoughts come from a pure, untouched place. This is why Haage is extracted from Southern Estonian borewells and bottled straight at the source.

SIMPLE

We supply you with all the essentials and are here to remind you not to complicate your life. And such simplicity goes with absolutely everything, complimenting any taste and any table.

INSPIRING

We believe in good energy. The importance of cherishing the beautiful moments in life. That every day is like a blank canvas, ready for new ideas and challenges.

HAAGE WATER
Still, Sparkling, Haanja

For those who go to bed when the sun rises and are ready to experience it all again the next day. For people that never get tired of discovering the world, others around them, or themselves. Haage water equips you with power full of beneficial natural minerals and good energy.

Mg ²⁺ :	25 - 29 mg/l
Cl ⁻ :	1180 - 1420 mg/l
SO ₄ ⁻ :	29 - 35 mg/l
Minerals:	1900-2300 mg/l

ESTONIA

Estonia, a land where **clean and untouched nature** co-exists with the **world's most digitally advanced society**. It is a place where bright ideas meet a can-do spirit.

This Northern European country stands out with an excellent business climate, having the most startups per capita in Europe.

Estonians take great pride in their **pristine, untouched nature**. And rightly so - Estonia holds fourth place in urban air quality in the world, while **51% of the country is covered in forests**.

The appreciation for nature also makes the country one of the most sustainable in the world.

The country has 2355 islands and a diverse terrain that spans rocky beaches, old-growth forests, and many lakes - the latter of which are all **sources of pure water**.

THE SILIKAAT GROUP

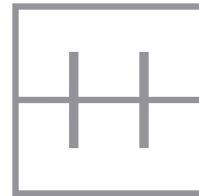

The group consists of 35 Estonian-owned companies that operate under the same holding company - the Silikaat Group.

The oldest company in the group, AS Silikaat, was **founded in 1910** and has been active in the production of bricks and sand mining for more than 100 years. It owns the only factory in Estonia that produces silicate bricks. There are very few companies in Estonia which, looking back to their early days, can say that they have survived through different regimes, two World Wars, the War of Independence, and numerous generations. AS Silikaat is one of a kind for its scale and history.

Together with the other 34 companies, the Silikaat Group is like a **cross-section of society** - its fields of business range from **agricultural production to real-estate management**.

The group's mission is to create opportunities for its companies so that they can develop in their area of business in the best possible way. The group aims to be **bold** by investing in bold projects that bring value to the country; **caring** by valuing the environment around us; and **reliable** by always following the principle that promises must be fulfilled.
